

Feed-in Tariffs A Proven Success in Germany

Rep. Bill Delahunt (D-Mass) said,

“As the former chairman of the Congressional Study Group on Germany, it is clear to me that the single most important step we can take in order to promote a rapid growth of renewable energy in the United States is to adopt our own version of the German feed-in tariff. In my travels to Germany I have been amazed at how this very simple policy has created an explosion of grassroots interest in the use of solar and wind energy. It is time to bring this renewable energy revolution to the United States.”

World Future Council calls Feed-in Tariffs *“the world’s best renewable energy law.”*
